Intended to alert the user to the presence of important operation and maintenance (servicing) instructions in the literature accompanying this appliance.

The lightning flash with arrowhead symbol within the equilateral triangle is intended to alert the user to the presence of un-insulated "dangerous voltage" within the unit.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE ANY COVER. NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL ONLY.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD. DO NOT USE THIS PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PRESENT BLADE TO PREVENT FIRE OR SHOCK HAZARD. DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. TO PREVENT ELECTRICAL SHOCK, MATCH WIDE BLADE PLUG TO WIDE SLOT FULLY INSERT.

SAFETY INSTRUCTIONS AND GUARRANTY INFORMATION

1. Read Instructions. All the safety and operating instructions should be read before this product is operated.
2. Retain Instructions. The safety and operating instructions should be retained for future reference.
3. Heed Warnings. All warnings on the appliance and in the operating instructions should be adhered to.

4. Follow Instructions. All operating and use instructions should be followed; failure to do so can void this guarantee.

5. Water and Moisture. The appliance should not be used near water - for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.

6. Carts and Stands. The appliance should be used only with a cart or stand that is recommended by the manufacturer. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn. Wall or Ceiling Mounting. The product should be mounted to a wall or ceiling only as recommended by the manufacturer.

7. Heat. The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.

8. Object and Liquid Entry. Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.

9. Damage Requiring Service. The appliance should be serviced by qualified service personnel when:

- A: The power-supply cord or the plug has been damaged; or
- B: Objects have fallen, or liquid has been spilled into the appliance; or
- C: The appliance has been exposed to rain; or
- D: The appliance does not appear to operate normally or exhibits a marked change in performance; or
- E: The appliance has been dropped, or the enclosure damaged.

10. Servicing. In accordance with E.U. directives the user shall not attempt any service to the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel. Failure to follow this instruction can void this guarantee.

11. Ventilation Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must

not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is the manufacturer's instructions have been adhered to.

12. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer. The manufacturer will NOT take responsibility for non-recommended accessories.

13. Accessories. Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product.

14. Lightning. For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

15. Replacement Parts: When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

16. Use only cables in accordance with present standards, ask your dealer.

17. Do not use right away the equipment in case has been transported from a cold environment to a hot one. Moisture will appear, let it off for a while.

18. Cleaning. Do not use cleaning sprays where the controls are. The appliance should be cleaned only as recommended by the manufacturer. Clean by wiping with a cloth slightly damp with water. Avoid getting water inside the appliance.

19. Audio ON: When installation is complete and you are about to start using the unit. Before switching ON the unit DO lower the Mains and Headphones volume controls. Failure to do so can result in hearing injuries or amplification stage damage.

20. Safety Check Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. For AC line powered units - Before returning repaired unit to user, use an ohm-meter to measure from both AC plug blades to all exposed metallic parts. The resistance should be more than 100,000 ohms.

22. To prevent fire or shock hazard. Do not use this plug with an extension cord, receptacle or other outlet unless the blades

can be fully inserted to present blade, match wide blade plug to wide slot fully insert.

TERMS OF USE

Your unit comes with a serial number stuck on it. Do not tear the serial number; this can result in void guaranty.

SAFE AND EFFICIENT USE

Select carefully the emplacement of the unit. Avoid placing it under direct sun exposure. Avoid humid and damp places or rough environments with excessive dust and vibrations and excessive heat or cold. Also keep it away from humming sources like the motors of whirl washers or transformers or similar appliances.

No liquids must be close to the unit so that they can be spilled on it. To completely disconnect the unit from you mains supply unplug the plug of the adapter from the wall electric outlet.

The switch that controls the supply of electrical power to the unit must be at easy reach in case is necessary a fast switch off.

WARNING: do not place the unit in a closed environment where is difficult to access the wall outlet.

Do not open the unit; it can cause personal injuries or the damage of the equipment.

When unplugging the power supply cable of the adaptor from the wall outlet, does not pull the cable. Take the plastic body of the plug and unplug it.

Do not handle roughly the controls of the unit you can shorten their lifespan.

Before moving the equipment, remember to unplug all cables.

Do not use chemical solvent to clean the unit. A dry and clean cloth will do fine.

Safe this manual at reach so you can go back to the basic in case you need it.

PRELIMINARY

Check the contents of the QUARK box and find the following items:

- 1- Controller
- 1- Installation and instructions CD
- 1- Traktor Overlay
- 1- USB Cable (PC/MIDI)
- 1- Transformer AC/DC

FIRST STEPS

Equipment installation

Install the equipment on a stable and horizontal surface.

Avoid placing it under direct sun exposure humid and damp places or rough environments.

Place the equipment as far away as possible of other audio equipment as radios TVs etc.

This product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The recycling of materials will help to conserve natural resources.

For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

1. CONTROLS AND CONNECTIONS

1.1. Top panel

1. Controls Distribution for an optimal use of Virtual DJ and Traktor.
2. CUE, PLAY and SYNC buttons are rubber for longer lifespan.
3. Control of up to 4 Decks. MIDI notes are sent through different MIDI channels upon selection; DECK A/B or C/D. LEDs status are refreshed by firmware.
4. 8 potentiometers/buttons independent of deck status to control effects and/or samples. All can control two functions.

- MIDI notes are sent through different MIDI channels upon selection; FX or SP. LEDs status are refreshed by firmware.
5. Multimode knobs and encoder with 3 modes for each deck. Each control will be able to send 3 different MIDI notes upon mode selection. Each mode has a button colour associated.
6. Central mixer with 3 band equalizer with kill. On this section also are controllable the functions; gain for each channel, fader volume, crossfader and mains output level.

1.2. Rear panel

1. Power supply

Connect the unit to your computer through the USB connector. Connect the power supply unit to QUARK connector DC IN. QUARK can work only with the computer power through USB. The external power supply unit will only be necessary when

QUARK is connected to a hub (w/out external supply) or any other device unable to supply QUARK with enough power (current/voltage). Press POWER to turn ON/OFF the unit.

1.3. Connections

ATTENTION. Always unplug the unit before connecting the signal cables, otherwise can result in equipment damage.

1. If you need to change the signal connector first unplug the unit from the power supply; Either the USB or the external adapter.

2. SOFTWARE INSTALATION AND SETUP

Before you can start using Akiyama QUARK you will need a DJ Software. We will explain how to install Virtual DJ LE and how to configure Virtual DJ LE, Virtual DJ PRO and Traktor PRO 2.

2.1. Virtual DJ

There is a purpose built Virtual DJ LE for QUARK. In case you have a license for Virtual DJ PRO the software will automatically identify QUARK. We will go through the different steps to install and configure Virtual DJ LE and PRO to be controlled by QUARK.

2.1.1. Virtual DJ LE installation

Note: You must uninstall any Virtual DJ LE you had installed in your PC before you install the Virtual DJ LE (Quark) version. There can be only one Virtual DJ LE installed in each PC.

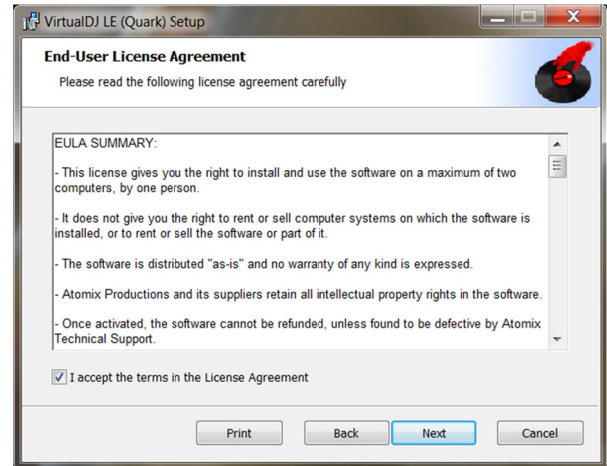

Windows Installation

Execute the Virtual DJ LE file clicking the icon install_virtualdj_le_vx.y.z.msi where x.y.z is the software version. Installation will start with welcome window as seen below.

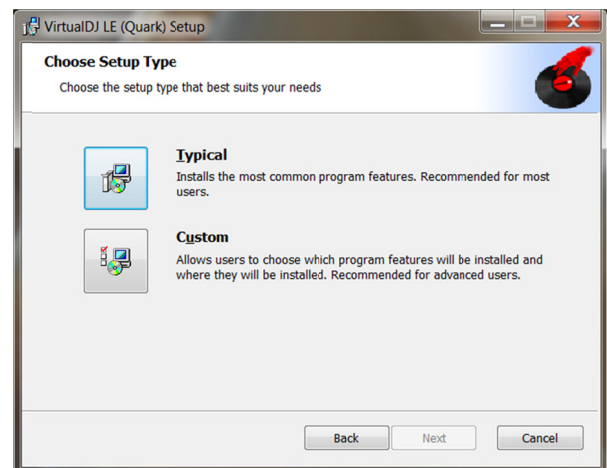

Select "Next" to start installation. Following the license agreement will show up.

NOTE: Use only the supplied cables for power supply through external adapter or USB to computer. Manufacturer cannot take responsibility for any damage caused by use of non-homologated cables.

Select the accept box and press "Next".

Type of installation is selectable; we recommend you start with "Typical". If in later installation you need to select concrete units to install you shall use "Custom" option.

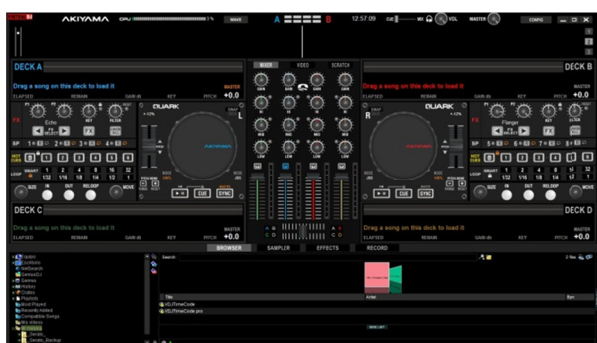

Press "Install", installation will start.

Once program is installed you can choose to launch it or exit. Select "Launch VirtualDJ" to start it.

The first time you run the program a window will require you to fill up the serial number that is supplied with your QUARK (find it at the label of the supplied CD). Fill it and press OK. Virtual DJ LE for QUARK will open:

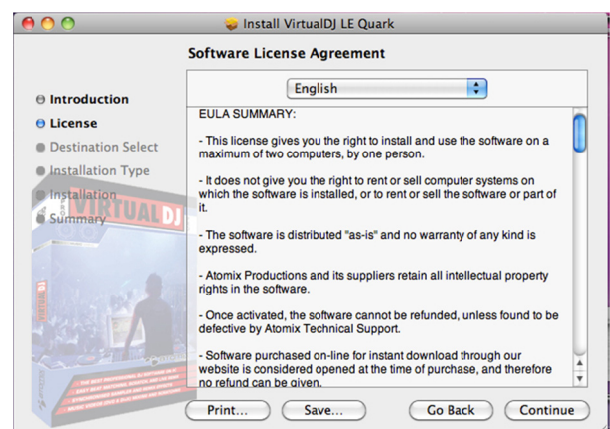

MAC Installation

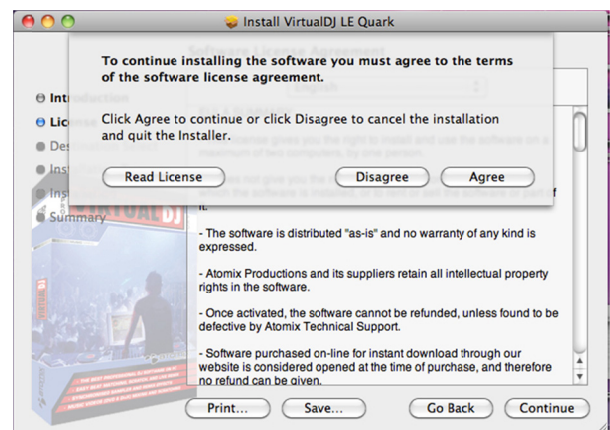

Execute the Virtual DJ LE file clicking the icon install_virtualdj_le_vx.y.z.pkg where x.y.z is the software version. Installation will start with welcome window as seen below.

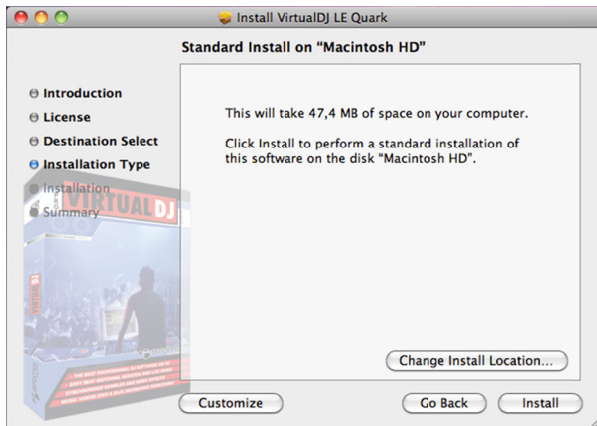

Select "Continue" to start installation. Following license agreement window will pop up.

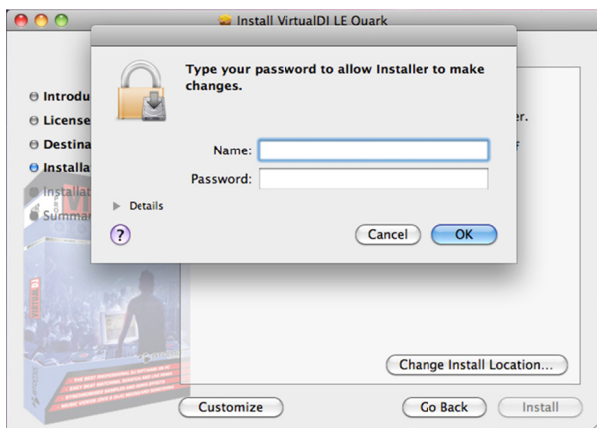

Select "Agree" and continue with installation wizard.

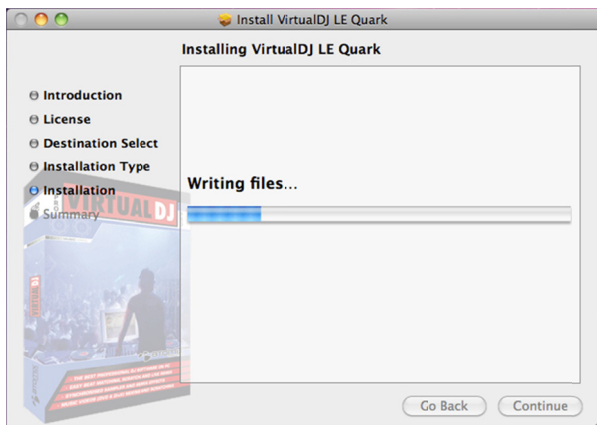

Following will appear a window showing the type of installation to choose. You can change/select the folder where it will reside the software, or press "Install" to commence at once.

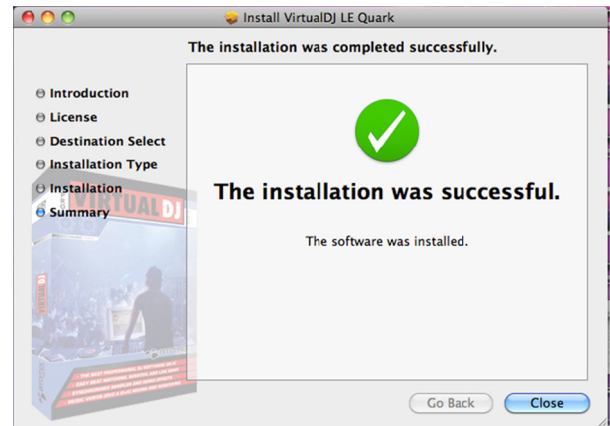

For introducing changes at the installation wizard you shall fill your name and password.

Meanwhile Virtual DJ LE is in process of install you will see the following window.

When install is complete and successful you will see a message as seen below.

Fist time you run the software a window as seen below will pop up. Fill up serial number provided with your QUARK (find it at the label of the supplied CD) and then click OK.

Following Virtual DJ LE for QUARK will open:

2.1.2. Virtual DJ LE updates

To update your software follow the steps:

-Open web page:

<<http://www.virtualdj.com/download/updates.html>>.

This is VirtualDJ download page.

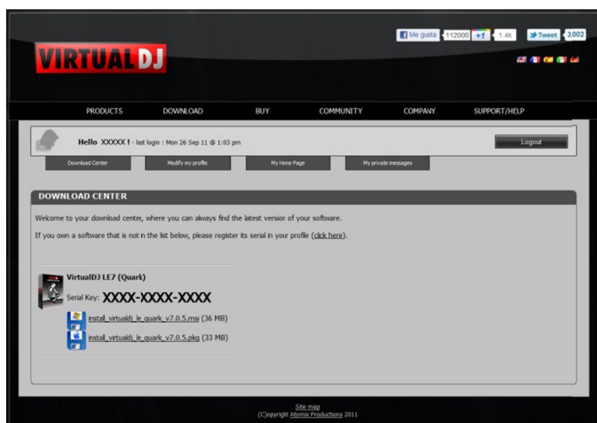

- Register or fill user name and password to access download. Once you access your account you will see a window as below:

- Click at (click here) to register your software for the first time. At following updates you will directly be directed to last point.
- Next you will see the window below, fill it with your serial number typed at your CD.

- An icon with name QUARK will show up. At this page you can find the available updates for QUARK. Download from this page.

2.1.3. Virtual DJ Pro Configuration

Virtual DJ PRO will automatically recognise QUARK controller. Therefore you will only have to configure the sound card.

2.2. Traktor

At QUARK box you will find an Overlay purpose designed for TRAKTOR 2 with QUARK. All controls functions correspond to the MIDI map that you can find at your CD at QUARK box. These maps are set to work with 4 Decks. Decks A and B will be TRACK DECK type and Decks C and D will be SAMPLE DECK type. To load these files (MIDI maps) at your TRAKTOR 2 go to Preferences/Controller Manager and press Import.

As you press Import a window with a Browser will appear then you can select the tsi file at the folder where you have the MIDI MAPS.

3. FUNCTIONS AND CONTROLS

3.1. Virtual DJ

1. EFECTOS/SAMPLERS

The controls included in this region can be used to control EFFECTS (FX) as well as SAMPLERS (SP). It can be switched between these two modes by pressing the button above FX/SP LED:

FX MODE:

- Two parameters of effects can be adjusted by turning P1 and P2 knobs.
- Turn the KEY knob to change the song's key. Push it to lock the key.
- Use the Filter knob to change and reset Filter.
- Use the buttons to select one effect () and activate it (ACTIVE).
- NOTE: FX controls modify the effect of the selected deck (see point 4).

SP MODE:

- Play/Pause a sample by pressing a knob. Each knob S1/S8 is associated with one sample.
- Turn the knob to adjust the volume of the sample.
- Start/Stop recording a sample by pressing the button corresponding to the sample number. The active deck will be recorded.
- Press SHIFT + button to switch between looped or one-shot mode.

2. SHIFT

The Shift Button provides a second MIDI layer for the selected deck.

- Press the button labelled with a bin (3) while keeping SHIFT pressed to make SHIFT remain activated even when SHIFT button is released. Press the button labelled with a bin again to deactivate SHIFT.

3. MULTIMODO HOTCUE/LOOP

The round button provides one MIDI layer for each mode for all the controls inside the box labelled with a 3. Change from one mode to another by pressing it.

- Adjust the loop size by turning the encoder and activate/deactivate the loop by pressing it.
- Press SHIFT+ turn encoder to move the loop the same size the loop has.
- Under Video mode turn the encoder to select a Transition (deck L) or an Effect (deck R). Press the encoder to activate/deactivate the Transition or Effect.
- Under Video mode press SHIFT + turn the encoder to adjust the loop size.

HOT CUE (round button unlit):

- A hot cue can be set and stored by pressing any of the 6 numbered cue buttons if the selected cue slot is free (unlit LED).

- Press any cue buttons, which have a cue point stored, to trigger the stored cue.
- Hot cues can be deleted by pressing the cue button while holding the button labelled with a bin.
- Press SHIFT + HOT CUE 1 to activate/deactivate Smart Hot Cue.
- A yellow lit button means that there is a hot cue saved.

AUTO LOOP (round button orange):

- An autoloop is set by pressing any of the 6 numbered buttons. The autoloop size depends on the pressed button and can be set from 1 to 32 beats.
- The autoloop is deactivated by pressing the button corresponding to the actual size.
- Change the loop size by pressing a button which has associated a size different than the actual active loop size.
- Press SHIFT + HOT CUE 1 to activate/deactivate Smart Loop.
- In this mode all buttons will light orange. The button corresponding to the active loop size will blink.

LOOP ROLL (round button green):

- An autoloop is set by pressing any of the 6 numbered buttons. The autoloop size depends on the pressed button and can be set from 1/32 to 1 beat. The loop will be active only while the button is hold.
- Press SHIFT + HOT CUE 1 to activate/deactivate Smart Loop.
- In this mode all buttons will light green. The button corresponding to the active loop size will blink.

4. DECK SELECT

Switch between decks A/C and decks B/D.

5. LOOP

- Set the starting point of a loop by pressing IN button.
- Press OUT button to set the ending point of the loop.
- Press RELOOP to jump to the starting point of the loop. If loop is not activated, the last set loop will be activated.
- Press SHIFT + IN to enter in a mode in which the starting point of the loop can be modified, IN ADJUST. The IN button will blink while this mode is active. Turn the jog wheel to modify the starting point. Press SHIFT + IN to exit from the mode. If this mode is active but there is not any loop active, the last set loop will be activated when the jog wheel is turned.
- Press SHIFT + OUT to enter in a mode in which the ending point of the loop can be modified, OUT ADJUST. The performance of this mode is equivalent to the IN ADJUST mode but in this case the ending point is adjusted.
- Enter to MOVE LOOP mode by pressing SHIFT + RELOOP. Performance is similar to IN/OUT ADJUST but in this case loop can be moved..

6. JOGWHEEL

- Press SCRATCH button to toggle the wheel mode between CDJ and Vinyl.
- Use the jog wheel to scratch or modify the pitch bend.
- Use SHIFT + jog wheel to search through the track
- Under Video mode press SHIFT + turn jog wheel to adjust the parameter of the effect

7. TEMPO

- Use the Pitch Fader to control the deck's tempo.
- Use the Pitch Bend buttons for pitch bending.
- Tempo Range can be selected by pressing SHIFT + pitch bend (-).
- Reset the tempo by pressing SHIFT + pitch bend (+).

8. TRANSPORT

- Press Play/Pause button to Start/Stop playback of deck.
- Press SHIFT + Play/Pause to skip to the first beat of the track.
- If song is paused, set a new cue point or if you are in the cue point position play the track from the cue point by pressing the CUE button and return to cue point when released. If song is playing, press CUE to pause the reproduction and jump to the last cue point.
- Use SHIFT + CUE to activate/deactivate Smart Play.
- Use the SYNC button to match the BPMs of different tracks.
- Press SHIFT + SYNC to set to master the deck in which it has been pressed.

9. MIXER

- Tweak the sound using the 3-Band EQ
- Turn the MASTER knob to adjust the volume of the master signal.
- Adjust the deck volume by turning the gain knob.
- Select the deck that must be pre-listened by pressing the Monitor buttons (labelled with headphones).
- Press SHIFT + Monitor button to select the beat of the working deck which will be shown in front in the display.
- Use the Linefader and Crossfader for mixing.
- Use AUTO buttons to automatically crossfader to the other deck.
- Under Video mode press LINK to link or unlink the video crossfader to the audio crossfader.
- Under Video mode use AUTO to move the video crossfader automatically.

10. BROWSER

- Turn the encoder to scroll through the songs.
- Press SHIFT + turn the encoder to scroll through the folders.
- Load the song to the active deck by pressing LOAD buttons.
- Press the encoder to open or close the subfolders of the selected folder (when focus is on folders).
- Press SHIFT + encoder to open or close the subfolders of the selected folder (when focus is on folders).
- Switch the mixer section between mixer and video by pushing VIDEO MODE.

3.2. Traktor PRO 2

**1. FX MODE.**

There is SINGLE and GROUP modes.

In mode SINGLE (SLG) we modify different parameters of a given effect. In mode GROUP (GRP) we modify one parameter of each of the three effects we can use in together.

- SGL: Changes to GROUP mode.
- GRP: Changes to SINGLE mode.

- DRY/WET:

SGL and GRP: Determines the amount of processed signal (by the effect) versus original signal that will be played.

- FX ON:

SGL: ON/OFF the effects module.

Shift (SGL): Selects the next effect on the list.

- FX 1:

SGL: Adjusts the Parameter 1 of the selected effect.

GRP: Adjusts the level of the effect 1.

- FX RESET:

SGL: Return to the original (manufacturer) configuration.

Shift (SGL): Selects the previous effect on the list.

GRP: effect 1 ON/OFF.

Shift (GRP): Selects the next effect on the list.

- FX 2:

SGL: Adjusts the Parameter 2 of the selected effect.

GRP: Adjusts the level of the effect 2.

- FX BUTTON 1:

SGL: function upon selected effect ON/OFF.

GRP: effect 2 ON/OFF.

Shift (SGL): Selects the next effect on the list.

- FX 3:

SGL: Adjusts the Parameter 3 of the selected effect.

GRP: Adjusts the level of the effect 3.

- FX BUTTON 2:

SGL: function upon selected effect ON/OFF.

GRP: effect 3 ON/OFF.

Shift (GRP): Selects the next effect on the list.

2. SHIFT.

SHIFT button duplicates the functions of the controls of the deck. There are two modes:

- SHIFT is active while the button is pressed.
- To engage permanently SHIFT mode press SHIFT and DELETE while keeping SHIFT pressed. To return to normal Shift mode press DELETE again.

SHIFT button will light when shift is engaged.

Each Deck has a SHIFT button. SHIFT button of right deck only affects the controls of right deck. SHIFT button of left deck only affects the controls of left deck.

3. PLAY SAMPLE (TRACK DECK).

- S 1: plays sample at slot 1.

Shift: Switches between the two possible sizes of the Deck.

- S 2: plays sample at slot 2.

Shift: Shows/hides Advanced Panel.

- S 3: plays sample at slot 3.

Shift: Waveform Zoom IN.

- S 4: plays sample at slot 4.

Shift: Waveform (Zoom OUT).

3. PLAY SAMPLE (SAMPLE DECK).

- S1 - S4: Records at the tracks list the sample of the corresponding slot.

4. MULTIMODE (TRACK DECK).

- SELECT MODE:

The round button switches between the three possible modes of the advanced panel (CUE/MOVE/GRID).

The function of the multimode buttons, knobs and encoder will change upon the selected mode.

- DELETE (⏻):

Delete Cue points. Press DELETE buttons and also press the Hot CUE button you want to delete. Delete function is active only in CUE mode.

Shift: Enables Shift in permanent mode.

- BUTTON 1:

CUE: Hot cue 1

Shift: Memorizes a cue/Loop at the first available cue point.

MOVE: Selects track move mode. With this button we select Move Mode.

GRID: Displaces Grid backwards.

- BUTTON 2:

CUE: Hot cue 2

Shift: no function.

MOVE: Selects track move mode. With this button we select next Move Mode option.

GRID: Displaces Grid forward.

- BUTTON 3:

CUE: Hot cue 3

Shift: Jumps to the next cue point.

MOVE: Selects the movement size.

GRID: BPM fine tuning.

- BUTTON 4:

CUE: Hot cue 4

Shift: Jumps to the previous cue point.

MOVE: Selects the movement size.

GRID: BPM fine tuning.

- BUTTON 5:

CUE: Hot cue 5

Shift: Select Cue point type from a list. Choose previous option at the list.

MOVE: Moves playback point backwards.

GRID: Grid automatic adjust.

- BUTTON 6:

CUE: Hot cue 6

Shift: Select Cue point type from a list. Choose next option at the list.

MOVE: Moves playback point forward.

GRID: Tempo automatic adjust.

- AUTOLOOP: Turn the control to select loop size. Press to set the loop. The LED blinks when a loop is set.

Shift: Turn the control to move the loop through the track. This function operates only when a loop is playing.

4. MULTIMODE (SAMPLE DECK).

- SELECT MODE: The round button switches between the three possible modes of Sample Deck:

SELECT SLOT: This mode is for activating the different Slots.

When a slot is active we can perform some actions upon it (volume setting, scratch, pitchbend, play/pause and others).

DECK LOAD: On this mode we can load loops from Deck A or B. First you have to select the slot where to load the loop with SELECT SLOT.

LIST LOAD: On this mode we can load loops from a list of songs/tracks or loops or the loops from the LOOP RECORDER.

- DELETE (⏻):

On this mode we can delete the loop loaded on the selected slot.

Shift: Engages SHIFT permanently.

- BUTTON 1 - 4:

SELECT SLOT: Select slot 1-4.

DECK LOAD: Loads the loop from the deck to slot 1-4.

Shift: Loads the loop from the opposite deck.

LIST LOAD: Loads the loop from the tracks list to slot 1-4.

Shift: Loads the loop from the LOOP RECORDER section to slot 1-4.

- BUTTON 5:

SELECT SLOT: All slots from one deck are selected at once.

DECK LOAD: No function.

LIST LOAD: No function.

- BUTTON 6:

SELECT SLOT: While the button is pressed all Samples of a given deck will activate.

DECK LOAD: No function.

LIST LOAD: No function.

- AUTOLOOP: Turning the control we set the Slot volume. Press the control to silence the slot.

The LED light when the slot is muted.

Shift: Turning the control we adjust the filter at the selected Slot. Pressing the control the filter is turned off.

5. TRANSPORT/JOG WHEEL (TRACK DECK).

- PLAY/PAUSE: Start/Stop playback.

Shift: Skips to the track beginning.

- CUE: Skips to the last Cue set.

- SYNC: Synchronizes the BPM value with the BPM master.

Shift: MASTER Function. Selects which deck is the master tempo.

- ACTIVE: ON/OFF "loop active" function. This function is automatically activated each time we set an Autoloop or a loop with IN/OUT buttons.

- IN: Sets the beginning of a loop.

IN ADJUST: Meanwhile you press the button use the wheel to adjust the starting point of loop. Loop must be playing.

- OUT: Sets the end of a loop.

OUT ADJUST: Meanwhile you press the button use the wheel to adjust the end point of loop. Loop must be playing.

- PITCH FADER: Adjusts the tempo of the deck.

- PITCHBEND: Adjusts the tempo of the deck while buttons are pressed. When released tempo return to original value.

Shift: Assigns FX1 and FX2 modules to each deck.

- SCRATCH (⌫): ON/OFF SCRATCH mode.

Shift: Changes pitch range upon the given values.

- DECK: Selects SAMPLE DECK (C/D).

- JOG WHEEL: Turn the wheel to adjust the deck tempo.

SCRATCH: Turn to perform scratch when SCRATCH mode is ON.

LOOP ADJUST: Turn the wheel to adjust start and end point of a loop pressing buttons IN/OUT.

Shift: Fast move through a track.

5. TRANSPORT/JOG WHEEL (SAMPLE DECK).

- PLAY/PAUSE: Start/Stop playback of selected slot.

- CUE: Toggles between simple play and loop play of the sample.

- SYNC: Synchronizes the BPM value of the active slot.

- IN: sample size is halved.

- OUT: sample size is doubled.

- ACTIVE: sets sample size to original value.

- PITCH FADER: Sets the tempo of the active slot.

- PITCHBEND: Adjusts the tempo of the sample while buttons are pressed. When released tempo return to original value.

Shift: Assigns FX1 and FX2 modules to each deck.

- SCRATCH (⌫): Pressing the buttons the selected sample playback stops. If we turn the wheel with the button pressed we have scratch effect.

- DECK: Selects TRACK DECK (A/B).

- JOG WHEEL: turn the wheel to set the tempo of the active slot.

SCRATCH: press/hold the button to enable scratch effect.

6. MIXER/EQ.

- HIGH: turn to control the high frequencies and mutes/KILL them when pressed, LED will light when mute is on.

Shift: Press to activate the FILTER and turn to adjust it.

- MID: turn to control the mid frequencies and mutes/KILL them when pressed, LED will light when mute is on.

Shift: Press to activate the KEY LOCK and turn to adjust KEY.

- LOW: turn to control the low frequencies and mutes/KILL them when pressed, LED will light when mute is on.

Shift: turn to adjust PAN function.

- GAIN: turn to adjust channel Gain.

- AUTO: Press and there is an automatic crossfade to the selected side (Left/Right).

Shift: Assigns crossfade Left or Right to each of the 4 decks.

7. LOOP RECORDER.

- LOOP RECORDER: Press to engage LOOP RECORDER mode. The button will light.

- DRY/WET: Determines the amount of processed signal versus original signal that will be recorded. Press to select loop size.

- REC: Press to engage REC function on LOOP RECORDER mode. Once the loop size is surpassed the REC function is not active anymore.

- PLAY/PAUSE: PLAY/PAUSE function in LOOP RECORDER mode.

Shift: DELETE function. Erases the loop created under LOOP RECORDER.

8. MIXER/BROWSER.

- MASTER: sets the main output level or volume.

- BROWSER: Turn the encoder to browse through your list of songs/tracks. Press to enlarge the browser window.

Shift: Turn the encoder to browse through your list of folders. Press to open/close the folders.

- LOOP RECORDER: Press button to activate LOOP RECORDER mode.

Shift: Toggles vu-meter view mode. In first case vu-meters will show Left channel level and Right channel level respectively. Second press and vu-meters will show MASTER stereo output level.

- LOAD A/B:

Loads selected track to selected Deck.

- MONITOR CUE LEFT (🎧):

Pre-listen Left channel at headphones.

Shift: SNAP function ON/OFF.

- MONITOR CUE RIGHT (🎧):

Pre-listen Right channel at headphones.

Shift: QUANTIZE function ON/OFF.

4. CONFIGURATION AND UPDATE

4.1. Firmware Version

Follow the steps to view the firmware version currently installed.

- Turn OFF the Controller.

- Press/hold Right channel Headphones button while you Turn ON the Controller.

- Vu-meter LEDs will show firmware version until you depress the button.

e.g.: if firmware version is 2.3, two LEDs at Left LED bar will light and 3 LEDs at Right LED bar will light..

4.2. Firmware Update

Follow the steps to Update Firmware:

Note: only possible to update from a computer with Windows O.S.

- Turn OFF the Controller and connect it through USB to your computer.

- Press/Hold VIDEO MODE button.

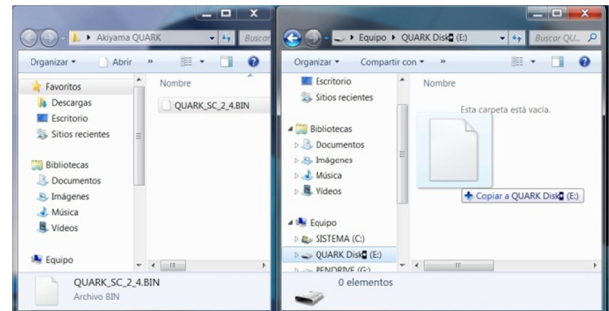

- Turn ON the Controller while VIDEO MODE button is pressed

- Depress the button when it lights up.

- It will appear in your computer a new mass storage device named QUARK Disk.

-Copy the file corresponding to the firmware you wish to load in the new disk (Quark Disk).

-When firmware update is finish all LEDs of QUARK will light up.

-Reboot the controller before using it with the updated firmware.

5. APENDIX

5.1. MIDI Specifications

A DJ Software have the “mapping” function that assigns MIDI messages to the different functions of the DJ Software.

We also have to match the DJ Software functions with the controls of the external device (the controller). We do so by assigning the DJ Software function and the control the same MIDI note or message.

Each of QUARK controls generates various MIDI messages you can see at table QUARK MIDI MAP. We can send the MIDI messages through channels 1 to 16, this is a MIDI standard. We can see three different parts on a MIDI message:

- The MIDI code (MIDI CODE) lets us know what type of message is sent.

- The FUNCTION CODE gives us the note or control value.

- The action let us know the value that the control attains when is manipulated.

At the table we have a column for each of the three parts of a MIDI message. The controls are grouped upon their in type so also upon their MIDI code.

DJ Software's use two types of MIDI codes:

- “Control Note” (switch): the control is a switch (you see a button) or a LED and will look like NOTE C2. Each note has a number that at the table is expressed in Hexadecimal (HEX). Further on at this manual we will explain how notes and numbers correspond to each other and how to change from hexadecimal to decimal. In this case MIDI CODE is 9 and FUNCTION CODE is the note of the control.

- “Control Change” (CC): the control will be a potentiometer or encoder and will have a label like Cc53. In this case MIDI CODE is B and FUNCTION CODE is a value between 0 and 127. We will associate a value to each control of the kind.

Upon the value of the action part of the MIID message we will classify the controls as follows:

a- NOTE-KEY: are note type messages. Action value can be 127 (7FH) when we press or 0 when we release.

b- NOTE-LED: determines the LED that will light, are note type messages as the switches and the values are 127 for LED ON and 0 for LED OFF. In the LEDs case it is the DJ Software that sends the MIDI messages to the controller.

c- CC-ABSOLUTE (VR) - CC “Control Change” Absolute. These are potentiometer like controls. The action value is a number between 0 and 127 upon the potentiometer position.

d- CC-RELATIVE (ENCODER/WHEEL) - CC “Control Change” Relative. These are encoder like controls. As oppose to the potentiometer that encoder does not send a message to report its position but only report changes when turning to clockwise or anticlockwise. It is sent the value 63 (3FH) if it turns to the left and 65 (41H) if it turns to the right.

e- CC-LEVEL LED. The value sent in the action from 0 to 127 will tell how many LEDs are to be turned ON at the vu-meter. At the before last column on the table you can find in the compressed way the values that each action can attain. There are DJ Software's where it is not necessary know note values or control values because this software “read” them automatically. That is called the “Learn mode” where by touching a control it assigns its note to a certain function selected by the user.

At other software you have to wright manually the values or for the LEDs at any software you have to do the writing because there is no Lear mode for exiting MIDI messages (i.e. LEDs). Therefore we recommend you try understanding the meaning and workings of the table QUARK MIDI MAP.

Following, we explain the columns of the MIDI MAP:

FUNCTION: here find the name of the control of QUARK as seen on its printing.

MIDI CODE: indicates if the message is a Control Note (9) or Control Change (B).

CHANNEL+MIDI CODE: appears MIDI CODE values with the channel (minus 1) used to send the message. Forward in this manual we explain the MIDI channels used at QUARK.

FUNCTION CODE: at this column we have the value of the note.

ACTION: here we have the action value. The different values that can attain are explained at parts a) and e).

Note: the MIDI MAP is presented in hexadecimal base > NOTE or CC. To assign physical control to software functions you need to translate the MIDI MAP into decimal base.

Following, we explain have to find out this equivalence HEX-DEC:

	0H	1H	2H	3H	4H	5H	6H	7H	8H	9H	AH	BH	CH	DH	EH	FH
0H	0	16	32	48	64	80	96	112	128	144	160	176	192	208	224	240

To translate a Hexadecimal base number into a Decimal base we have to:

- find the column that has the number that appears at the left.
- find the row that has the letter that accompanies the number.
- the convergence of row and column is the equivalent DEC number.

Inversely to translate an DEC base number into a Hex base we have to:

- find the number at the table. Its column is the first hex digit, the second hex digit is it row.

E.g. Play control MIDI address is 34. Find the DEC equivalence at the Hexa-Dec table: Column 3 / Row 4 it is decimal number 52.

Some softwares require not only know the decimal value but also the corresponding note (for control change the decimal number is enough). We can perform the Note-Decimal number equivalence using the following table:

Octave #	Note Numbers											
	C	C#	D	D#	E	F	F#	G	G#	A	A#	B
-1	0	1	2	3	4	5	6	7	8	9	10	11
0	12	13	14	15	16	17	18	19	20	21	22	23
1	24	25	26	27	28	29	30	31	32	33	34	35
2	36	37	38	39	40	41	42	43	44	45	46	47
3	48	49	50	51	52	53	54	55	56	57	58	59
4	60	61	62	63	64	65	66	67	68	69	70	71
5	72	73	74	75	76	77	78	79	80	81	82	83
6	84	85	86	87	88	89	90	91	92	93	94	95
7	96	97	98	99	100	101	102	103	104	105	106	107
8	108	109	110	111	112	113	114	115	116	117	118	119
9	120	121	122	123	124	125	126	127				

To find the note associated to a decimal number just take the column where the number is as the note and the row is the octave. Following the example presented before the corresponding note to Play button is E3.

As seen at FUNCTION CODE column of the MIDI table, each of the controls of QUARK can send two different messages upon the state of the Shift button. Remember we can permanently engage Shift.

QUARK can be divided in 5 parts and the controls that fall in each of these parts are sent through a different MIDI channel.

The central part of the controller has the controls to be sent through channel 5.

There are two areas that are not dependent upon Deck selection. These areas are devised to control effects and

samples. Press FX/SP button and the MIDI messages will be sent through two different channels, 6 and 7 for the controls at the left side of the controller and 8 and 9 for the controls at the right side of the controller.

Finally there are two more areas corresponding to Deck Left and Deck Right. The controls at the left deck will send

messages through channels 1 and 3 and controls at the right deck will send messages through channels 2 and 4.

At the following table find the table comprising all explained up to now.
